2-1-1

(<https://coronavirus.health.ok.gov/>)

ATTENTION: The Oklahoma State Department of Health's (OSDH) COVID-19 data tracker below will continue reporting active and recovered COVID-19 cases by county only, as permitted by State law. As of May 31, 2020, the agency will no longer be able to publish COVID-19 data by city, zip code, or by long-term care and nursing home facility due to the expiration of the State's Catastrophic Emergency Declaration. For more information on this change, please [click here](https://go.usa.gov/xwbjX) (<https://go.usa.gov/xwbjX>).

OSDH and the office of Governor Kevin Stitt are actively exploring additional legal opinions and solutions to ensure the public, the medical community, and elected leaders can access relevant COVID-19 data that will allow for quick and effective decision-making while Oklahoma awaits a treatment or vaccine to mute the novel virus

Current Situation

COVID-19 is a virus identified as the cause of an outbreak of respiratory illness first detected in Wuhan City, Hubei Province, China in 2019 and has since spread globally into a pandemic. Symptoms of COVID-19 include fever, cough, and shortness of breath. While roughly 80% of cases report mild symptoms, some progress into severe pneumonia and multi-organ failure and can lead to death. Current data indicates the risk of death for those contracting COVID-19 notably increases for individuals above the age of 60 or for individuals with autoimmune conditions. On January 21, 2020, the first set of individuals in the [United States](https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/cases-in-us.html?CDC_AA_refVal=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fcases-in-us.html) (https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/cases-in-us.html?CDC_AA_refVal=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fcases-in-us.html) tested positive for COVID-19. The virus has since spread across all 50 states and the number of individuals testing positive for COVID-19 continues to rapidly grow each day.

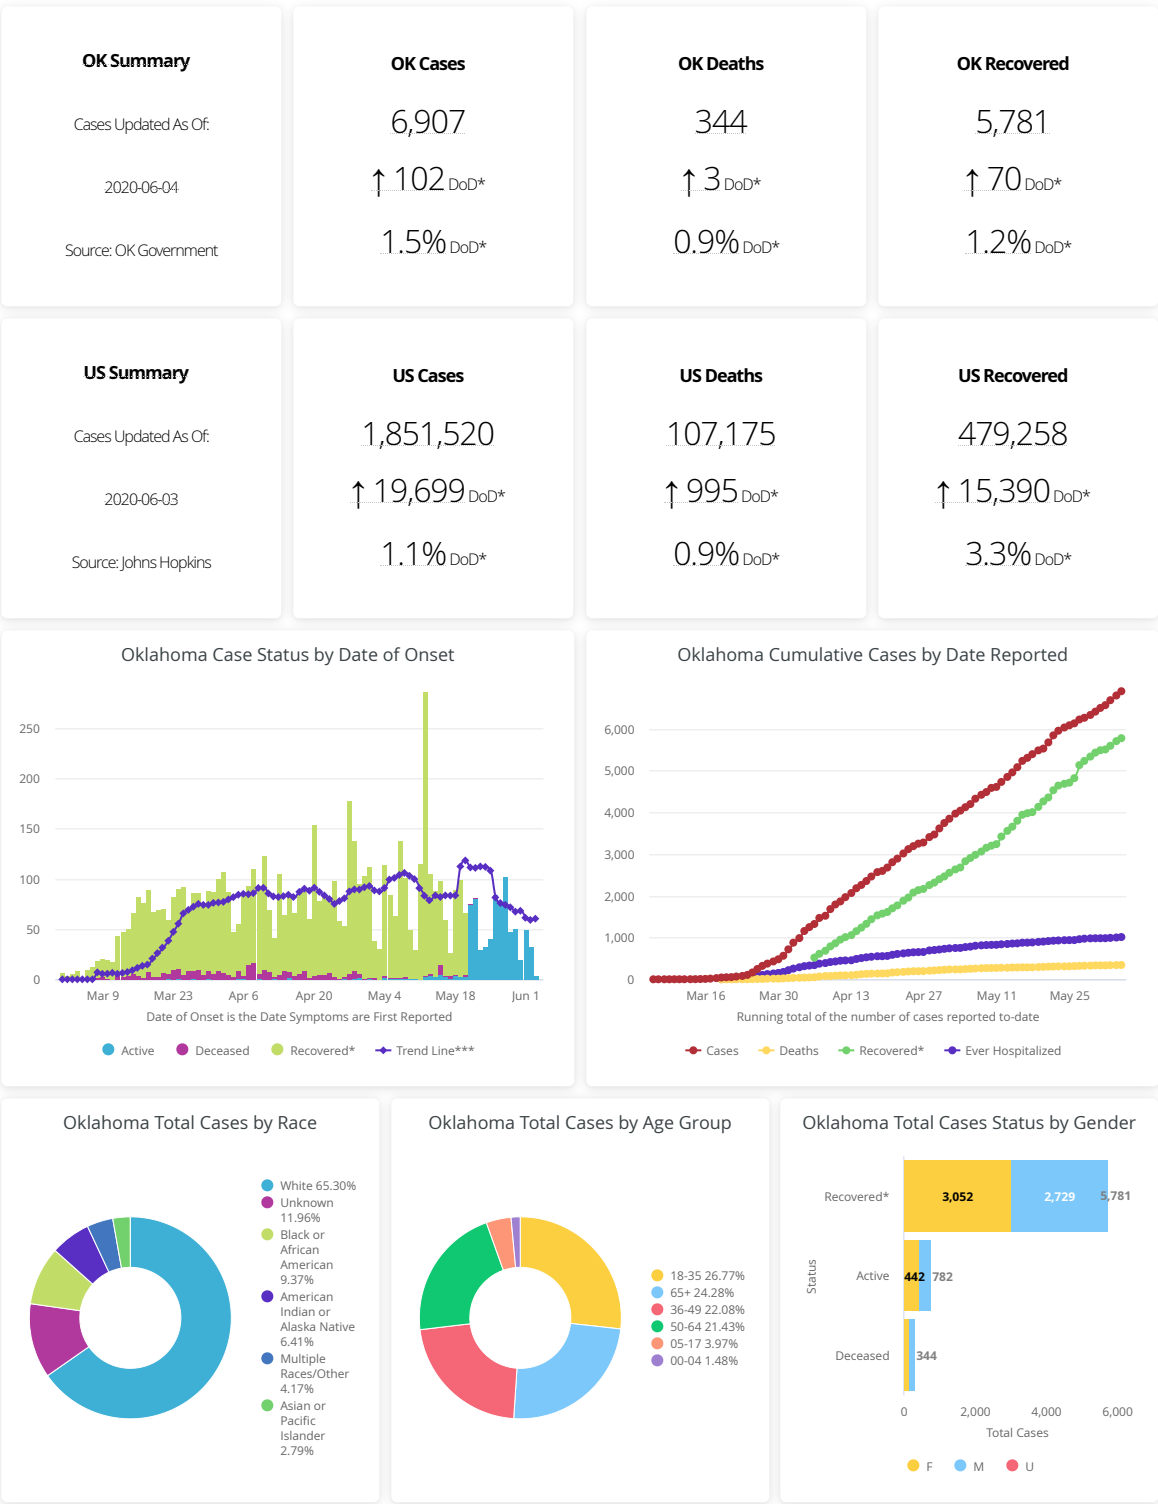

Dashboard

Additional data is available for review in the Executive Order Report (/executive-order-reports) and the Weekly Epidemiology and Surveillance Report (/weekly-epidemiology-and-surveillance-report).

DoD* indicate the delta (\uparrow ↓) or rate of change (%) over the past 24 hours only.

**Data shown are preliminary and subject to change as additional information is obtained.

Race/Ethnicity containing missing data is bucketed into the unknown category.

*Recovered: currently not hospitalized or deceased and 14 days after onset/report. Recoveries calculated beginning on 4/6/2020.

Trend Line*** is a 7 day rolling average of the number of the confirmed cases by date of symptom onset or positive test result for asymptomatic cases.

A 7 day lag has been applied to the trend line based on information collected to-date for the week of 5/3 and 5/9 where within 7 days of onset date 90% of the cases had been reported.
